

Pritish Kamble

Data Scientist

New York, USA | 716-295-3568 | prishkamble7@gmail.com

[LinkedIn](#) | [Portfolio](#) | [Google Scholar](#)

SUMMARY

Data Scientist with 5+ years of experience in building scalable machine learning and analytics solutions across marketing and finance industries. Skilled in Python, SQL, ML and cloud platforms. Proven track record of delivering business impact through predictive modeling, A/B testing, and dashboarding. Strong research background with 11 published papers in top journals (IEEE, Springer) and a master's thesis focused on antenna design and optimization. Passionate about using data to drive decisions and solve real-world problems.

EDUCATION

Master of Science in Data Science

Aug 2022 – Jan 2024

University at Buffalo - SUNY, Buffalo, New York, USA

- Courses : Introduction to Machine Learning, Statistical Data Mining I & II, Probability & Statistics, Python Programming, Database Management, NLP.

Master of Engineering in Electronics and Telecommunication Engineering

Aug 2016 – Feb 2019

University of Mumbai - Mumbai, India

- Courses: Statistical Signal Processing, Digital Signal Processing, RF & Antenna Design, Research Methodology.
- Graduate Teacher Assistantship : Python Programming for Fall 2017 and Spring 2018

Bachelor of Engineering in Electronics and Telecommunication Engineering

Aug 2011 – Jul 2016

Dr BAMU University, Aurangabad, India

WORK EXPERIENCE

KGS Technology Group, USA | **Data Scientist**

Feb 2025 - Current

- Developed ML models (Random Forest, XGBoost) on a dataset of 2 million records to improve credit default prediction accuracy, enhancing risk management for 30,000 accounts and reducing financial losses by 3%.
- Strengthened model transparency by applying SHAP and LIME techniques to interpret feature contributions, validate model behavior, and provide actionable explanations to business stakeholders.
- Performed data modeling, conducted analysis using Python and SQL (joins, CTE, views, indexes) and optimized query performance.
- Led end-to-end model development, feature engineering, model selection, and hyperparameter tuning, to optimize model accuracy.
- Engineered business-aligned feature sets, reducing model recalibration effort and improving interpretability.
- Conducted A/B testing on promotional email campaigns, leading to an 8% uplift in conversion rates.
- Collaborated with stakeholders to deliver insights using Power BI dashboards (DAX, Power Query), monitored key performance indicators (KPIs), and optimized marketing strategies based on scheduled and ad-hoc performance reports.
- Utilized Agile scrum methodologies to adapt to evolving project needs, delivering iterative solutions and ensuring timely adjustments.

JerseySTEM, USA | **Data Scientist**

Feb 2024 – Jan 2025

- Developed advanced predictive models for customer behavior analysis, driving a 30% increase in the effectiveness of targeted marketing campaigns by delivering more personalized experiences.
- Improved market research team performance by 11% through activity monitoring, KPI development, and exploratory data analysis (EDA) on Salesforce data using advanced SQL.
- Conducted exploratory data analysis (EDA) on real-time and historical employee data using Python, visualizing trends with Matplotlib and Looker, resulting in an 11% reduction in operational inefficiencies.
- Developed predictive models for employee engagement and attrition using algorithms like Logistic Regression, Random Forest and XGBoost improving retention strategies.
- Leveraged NLP and LLMs to develop a classification model to categorize text (files, paragraph) based on specific aspects.

Outlier.ai, USA | **Prompt Engineer**

Oct 2024 - Dec 2024

- Enhanced the accuracy and reliability of large language model (LLM) responses across mathematical, Python, and SQL tasks by identifying and correcting errors.
- Engineered and optimized 100+ prompts to address model limitations, enhancing response accuracy and overall output quality.
- Evaluated outputs for instruction comprehension, accuracy, and efficiency, ensuring adherence to high-quality standards, thereby contributing to the refinement of AI-driven solutions.

Codewrap Software Solutions, India | **Data Science Analyst**

Mar 2019 - Jul 2022

- Build end-to-end data analysis using SQL and developed 15+ interactive dashboards and reports to visualize business metrics and trends.
- Designed and implemented data pipelines to transform raw data into actionable insights, supporting the development of data-driven products that optimized internal operations.
- Built a data management app with AppSheet, integrating anomaly detection algorithms to enhance data access efficiency by 30% and reduce error rates by 20%, while improving user engagement by 12% with Figma-designed UI/UX.

PROJECTS

Generative Chatbot: Empathetic Multi-topic conversational AI | GPT2, LLMs, NLP, RAG, GCP, API

- Built a generative chatbot by fine-tuning GPT-2 on 200K Reddit posts and empathetic data to understand emotions, respond correctly while switching topics, achieving 73% accuracy.
- Built a RAG system using Apache Solr and RoBERTa to optimize factual responses by providing context, resulting in 15+ coherent responses.

Real Time Monitoring of Parking Spots using Computer Vision

- Designed a real-time parking lot monitoring system that detects available parking spot from surveillance video, creating custom dataset of 2K+ cropped parking spot images from video feeds and applying preprocessing to enhance feature extraction.
- Trained and optimized an SVM classifier with GridSearchCV, achieving 90%+ accuracy in classifying parking spot status, and deployed results by overlaying predictions directly onto live video feeds for intuitive visualization of available spaces.

SKILLS

Programming & Scripting: Python (Pandas, NumPy, Scikit-learn, Seaborn, TensorFlow, PyTorch), R, SQL

Machine Learning & AI: Predictive Modeling (Linear/Logistic Regression, Time Series, Forecasting), Decision Trees, Random Forest, SVM, K-Means Clustering, K-Nearest Neighbors (KNN), Naive Bayes, XGBoost, Sentiment Analysis, NLP (Spacy, NLTK, Transformers), LLMs (OpenAI, Hugging Face, LangChain), Deep Learning (CNN, RNN, LSTM), RL, AutoML, Model Interpretability

Statistical Modeling: Hypothesis Testing (T-test, Chi-Square, ANOVA), A/B Testing

Databases: MySQL, PostgreSQL, SQL Server, MongoDB, BigQuery, Snowflake

Data Engineering & Pipelines: ETL, Data Cleaning, Feature Engineering, Apache Airflow, Spark (PySpark), REST APIs, Data Integration

Data Visualization & BI Tools: Tableau, Power BI (Power Query, DAX), Looker Studio, Plotly, Matplotlib, Excel (Pivot Tables)

Cloud & Big Data Platforms: AWS (S3, EC2, SageMaker), GCP (BigQuery, Vertex AI), Azure ML, Databricks

Project Management & Methodologies: Agile/Scrum, JIRA, Stakeholder Engagement, Cross-Functional Team Collaboration

Soft Skills: Communication, Problem-Solving, Strategic Thinking, Collaboration, Business Acumen

RESEARCH EXPERIENCE

Master's Thesis: Novel 120° Sectoral Microstrip Antenna Design | Mumbai University

May 2016 – Feb 2019

- Proposed and developed a novel 120° sectoral microstrip antenna design, achieving a 20% bandwidth enhancement and broadside radiation patterns, addressing critical gaps in bandwidth and gain optimization for MSAs.
- Engineered advanced gap-coupled and stacked configurations, achieving a 10% bandwidth increase and uncovering higher-order mode interactions through comprehensive modal analysis, enhancing performance for wireless systems.
- Authored 11 research papers published in prestigious journals and conferences (IEEE, Springer), contributing significant advancements in bandwidth optimization, modal analysis, and wideband response techniques. [[Google Scholar Link](#)]

SELECTED PUBLICATIONS [[Google Scholar Link](#)]

- “Proximity Fed Broadband 120° Sectoral Microstrip Antenna”, AA Deshmukh, **P Kamble**, A Doshi, D Issrani, KP Ray., Procedia computer science 115, 101-107. [[Link](#)]
- “Multi-resonator variations of 120° sectoral microstrip antennas for wider bandwidth”, AA Deshmukh, **P Kamble**, A Doshi, APC Venkata., Proceedings of International Conference on Wireless Communication: ICWiCom [[Link](#)]

- “Multi-Resonator Stacked Variations of Sectoral Microstrip Antennas for Wideband Response.”, AA Deshmukh, **P Kamble**, A Doshi, D Issrani, KP Ray., International Journal of Microwave & Optical Technology 15 (4).[[Link](#)]

CERTIFICATION

- Machine Learning in Production – DeepLearning.AI
- Introduction to Apache Airflow in Python – datacamp
- Deeplearning.ai Tensorflow Developer Specialization
- Google Data Analytics Certification. (Pursuing)

ACHIEVEMENTS AND EXTRA-CURRICULARS

- Published 10+ research papers in IEEE, Springer and ScienceDirect.
- Published research paper in IJMOT journal on Multi-Resonant Stack Antenna - July 2020.
- Represented the Buffalo University Cricket Team in the Western New York Cricket League, earning the prestigious Man of the Series award for outstanding performance throughout the tournament.
- Captain of the Dr. Babasaheb Ambedkar Marathwada University Cricket Team, leading the team to victory in inter-university tournament.
